University of Georgia Press. Hardcover. Condition: New. 112 pages. Dimensions: 12.3in. x 9.3in. x 0.6in. Cumberland Island is the largest and most beloved of the Georgia barrier islands. Although it can be reached only by boat, more than forty thousand people make the trip each year to enjoy the islands natural splendor and solitude. As on most barrier islands, human activity has long been a shaping force on Cumberland. It is among the few islands, however, that we have let return to a relatively natural state. With its expansive oceanfront beaches, dunes, interior maritime forests, freshwater ponds, tidal creeks, and salt marshes, Cumberland is all the more special for its restored natural environment. In *The Seasons of Cumberland Island*, naturalist and photographer Fred Whitehead captures the unique allure of the islands flora and fauna in 118 stunning full-color photographs. Moving through seasons punctuated by the comings and goings of such animals as the migratory birds that rest here in autumn and the loggerhead turtles that nest here in summer, the photographs reveal the subtle but important effect of cyclical change on the islands ecosystem. The lush color images, which are often paired with detailed captions, include spectacular views of muscadine vines and Virginia creeper in autumn, a prowling bobcat in winter, a springtime nest of pileated woodpeckers, and a green tree frog announcing an impending summer rain. Featuring an introduction on the importance of the complex ecosystems of barrier islands like Cumberland, the book informs as it enchants. Here is a stunning tribute to Cumberlands sublime treasures that also serves as a thoughtful reminder to respect and protect the wildness of our barrier islands. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Hardcover.
