

Resilient Cities: Overcoming Fossil-Fuel Dependence (Paperback)

By Peter Newman, Timothy Beatley, Heather Boyer

Island Press, United States, 2017. Paperback. Condition: New. 2nd edition. Language: English . Brand New Book. What does it mean to be a resilient city in the age of a changing climate and growing inequity? As urban populations grow, how do we create efficient transportation systems, access to healthy green space, and lower-carbon buildings for all citizens? Peter Newman, Timothy Beatley, and Heather Boyer respond to these questions in the revised and updated edition of Resilient Cities. Since the first edition was published in 2009, interest in resilience has surged, in part due to increasingly frequent and deadly natural disasters, and in part due to the contribution of our cities to climate change. The number of new initiatives and approaches from citizens and all levels of government show the promise as well as the challenges of creating cities that are truly resilient. The authors hopeful approach to creating cities that are not only resilient, but striving to become regenerative, is now organised around their characteristics of a resilient city. A resilient city is one that uses renewable and distributed energy; has an efficient and regenerative metabolism; offers inclusive and healthy places; fosters biophilic and naturally adaptive systems; is invested in disaster...
