Reviews

A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.

Comma Press, United Kingdom, 2017. Paperback. Condition: New. Language: English . Brand New Book. Science is always telling stories. Whether in the creation myths of evolution or the Big Bang, or in the eureka moments of science history, narrative--just as much as metaphor--is a key tool in the scientist s surprisingly literary toolkit. Perhaps the most interesting use of story is the thought experiment, the intuition pump, that draws on the most instinctive parts of the imagination to crack otherwise perplexing problems. From Newton s Bucket and Maxwell s Demon to Einstein s Lift and Schrodinger s Cat, all are examples of fiction being used at the highest level, not just to explain but to deduce and to prove. In this unique anthology, authors--including Robin Ince, Sara Maitland and Adam Marek --have collaborated with leading scientists to bounce literary, human narratives against purely theoretical ones, alloying together real stories with abstract ones to produce truly extraordinary results.
