Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Blood-Stains: Their Detection, and the Determination of Their Source: A Manual for the Medical and Legal Professions To Science it matters little whether the birthplace of a discovery be here or elsewhere: our task is to find out whether the report of a new fact is true or false. - Orfila. If the Law has made you a witness, remain a man of Science: you have no victim to avenge, no guilty or innocent person to ruin or save. You must bear testimony within the limits of Science. - Brouardel. He who has had to do with Courts of Law will rightly appreciate this - he will understand how great a moral and legal responsibility the expert takes upon himself when he answers the question as to the presence of blood in the affirmative: on his answer may depend the honour and freedom, even the life, of the accused person. - Minovici. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
