Nothing but benefits from these contemplated works could accrue to the towns and industries on the shores of the lake, which have all, more or less, suffered in the past from the high -water stages. On the West Arm the removal of obstructions to navigation, and excessive currents would be of great benefit to all, while at the City of Nelson 3 large area of level land, at present flooded at a few feet above low water would be permanently reclaimed. Adding considerable acreage to the waterfront. No very difficult engineering features are represented anywhere, except it be at First Rapids, and it may safely be considered that the work can be done in two years once the controlling dam is built and in operation.
