

A Comparative Guide to Standard Form Construction and Engineering Contracts

By Jon Close

Law Brief Publishing Ltd. Paperback. Condition: New. Dimensions: 9.2in. x 6.1in. x 0.4in. An entry level guide for anyone involved with the drafting of specific construction or engineering contracts, this book looks to provide the busy professional with a road-map of how to get from desired cost, quality and time outcomes through using the most appropriate procurement route and the most appropriate contractual options available within three of the most well-known standard form construction and engineering contracts (JCT, NEC and FIDIC). A useful aide-memoire for engineers, quantity surveyors, commercial directors, owner-managed businesses and fellow solicitors alike, the book seeks to compare and contrast the standard contractual options to inform commercial decision-making which can then be accurately translated into the final draft of the contract. Written by Jon Close, a construction lawyer by profession, this publication seeks to de-mystify some of the art of drafting contracts to make the task seem less daunting and looks to help people draft better contracts to avoid uncertainty and help mitigate, what are all too often, unnecessary disputes down the line. ABOUT THE AUTHOR Jon Close is an English Solicitor with over 12 years experience specialising in construction and engineering law, bringing particular contractual expertise in the...

Reviews

Excellent electronic book and valuable one. Better then never, though i am quite late in start reading this one. I am very easily can get a delight of studying a written book.

-- Anastacio Kreiger DDS

This ebook is amazing. It typically will not price excessive. I discovered this pdf from my dad and i recommended this publication to learn.
