

Summary of Sediment Data from the Yampa River and Upper Green River Basins, Colorado and Utah, 1993-2002: Usgs Scientific Investigations Report 2004-5242

Filesize: 9.65 MB

Reviews

This published publication is excellent. This really is for all who statte there had not been a well worth studying. I am very happy to inform you that this is the very best ebook i have read through within my very own daily life and could be he greatest pdf for possibly.
(Mrs. Maybelle Gleason DDS)

SUMMARY OF SEDIMENT DATA FROM THE YAMPA RIVER AND UPPER GREEN RIVER BASINS, COLORADO AND UTAH, 1993-2002: USGS SCIENTIFIC INVESTIGATIONS REPORT 2004-5242

To read **Summary of Sediment Data from the Yampa River and Upper Green River Basins, Colorado and Utah, 1993-2002: Usgs Scientific Investigations Report 2004-5242** eBook, make sure you access the web link under and save the file or have accessibility to additional information that are in conjunction with SUMMARY OF SEDIMENT DATA FROM THE YAMPA RIVER AND UPPER GREEN RIVER BASINS, COLORADO AND UTAH, 1993-2002: USGS SCIENTIFIC INVESTIGATIONS REPORT 2004-5242 book.

Bibliogov, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.The water resources of the Upper Colorado River Basin have been extensively developed for water supply, irrigation, and power generation through water storage in upstream reservoirs during spring runoff and subsequent releases during the remainder of the year. The net effect of water-resource development has been to substantially modify the predevelopment annual hydrograph as well as the timing and amount of sediment delivery from the upper Green River and the Yampa River Basins tributaries to the main-stem reaches where endangered native fish populations have been observed. The U.S. Geological Survey, in cooperation with the Colorado Division of Wildlife and the U.S. Fish and Wildlife Service, began a study to identify sediment source reaches in the Green River main stem and the lower Yampa and Little Snake Rivers and to identify sediment-transport relations that would be useful in assessing the potential effects of hydrograph modification by reservoir operation on sedimentation at identified razorback spawning bars in the Green River. The need for additional data collection is evaluated at each sampling site. Sediment loads were calculated at five key areas within the watershed by using instantaneous measurements of streamflow, suspended-sediment concentration, and bedload. Sediment loads were computed at each site for two modes of transport (suspended load and bedload), as well as for the total-sediment load (suspended load plus bedload) where both modes were sampled. Sediment loads also were calculated for sediment particle-size range (silt-and-clay, and sand-and-gravel sizes) if laboratory size analysis had been performed on the sample, and by hydrograph season. Sediment-transport curves were developed for each type of sediment load by a least-squares regression of logarithmic-transformed data. Transport equations for suspended load and total load had coefficients of...
