

## Conformance Test Architecture and Test Suite for ANSINIST-ITL 1-2011 NIEM XML Encoded Transaction

Filesize: 2.07 MB

### **Reviews**

*It is an awesome book that we have possibly go through. It is actually writer in straightforward words and phrases and not confusing. It is extremely difficult to leave it before concluding, once you begin to read the book.*

## CONFORMANCE TEST ARCHITECTURE AND TEST SUITE FOR ANSINIST-ITL 1-2011 NIEM XML ENCODED TRANSACTION

To download **Conformance Test Architecture and Test Suite for ANSINIST-ITL 1-2011 NIEM XML Encoded Transaction** PDF, remember to access the link listed below and download the ebook or gain access to other information which are highly relevant to CONFORMANCE TEST ARCHITECTURE AND TEST SUITE FOR ANSINIST-ITL 1-2011 NIEM XML ENCODED TRANSACTION book.

CreateSpace Independent Publishing Platform. Paperback. Condition: New. This item is printed on demand. 38 pages. Dimensions: 11.0in. x 8.5in. x 0.1in. The latest version of the ANSINIST-ITL standard was published in November 2011 (AN-2011). In addition to specifying Record Types in traditional encoding, the standard includes the specification of National Information Exchange Model (NIEM) Extensible Markup Language (XML) encoding and an associated schema. The Computer Security Division of NISTITL developed a Conformance Test Architecture (CTA) and Test Suite (CTS) called BioCTS for AN-2011 NIEM XML designed to test implementations of AN-2011 NIEM XML encoded transactions. Validating the XML files to a schema may indicate that the contained data is formatted correctly and individual values are within allowable ranges, assuming that the requirements for that data have been documented in the schema file. However, schemas are not designed to test the internal consistency of implementations (i. e. , testing for a relationship between two elements or structures within a transaction). These shortcomings of XML schema files for use in conformance testing necessitate that schemas be used only as a component of a complete testing solution. This complete solution (the test tool) ensures test coverage of requirements through a combination of schema validation and conformance tests of the data in the XML files. This document discusses the test software design including the XML Data Structures used and Classes implemented. It addresses the testing phases and the format of the test results; as well as the user interface and key usability features implemented in this version of the test tool. Details are provided on a modified schema that was required to be used in the tool in order to fully perform tests for all the requirements specified in the AN-2011 standard. Future development steps including support for the new version of the ANSINIST-ITL standard...
