Customer Satisfaction Evaluation: Methods for Measuring and Implementing Service Quality

By Evangelos Grigoroudis

Springer. Paperback. Condition: New. 308 pages. Dimensions: 9.2in. x 6.1in. x 0.7in. The customer orientation philosophy of modern business organizations and the implementation of the main principles of continuous improvement, justifies the importance of evaluating and analyzing customer satisfaction. In fact, customer satisfaction is considered today as a baseline standard of performance and a possible standard of excellence for any business organization. Extensive research has defined several alternative approaches, which examine the customer satisfaction evaluation problem from very different perspectives. These approaches include simple quantitative tools, statistical and data analysis techniques, consumer behavioral models, etc. and adopt the following main principles: The data of the problem are based on the customers' judgments and are directly collected from them. This is a multivariate evaluation problem given that customer overall satisfaction depends on a set of variables representing product/service characteristic dimensions. Usually, an additive formula is used in order to aggregate partial evaluations in an overall satisfaction measure. Many of the aforementioned approaches do not consider the qualitative form of customers' judgments, although this information constitutes the main satisfaction input data. Furthermore, in several cases, the measurements are not sufficient enough to analyze in detail customer satisfaction...
