Forgotten Books, 2018. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Marine Ecosystem Modeling: Proceedings From a Workshop Held April 6-8, 1982, Frederick, MD The modeling needs for this integrated process encompass the areas of deterministic and simulative models of environmental processes and effects, probabilistic or risk assessment models, and models for decision analysis, including models of value or utility and models for time preference and risk aversion. These needs are discussed briefly, and a generic set of information requirements is presented for major marine pollution issues. This set of needs requires the formulation, validation, and documentation of predictive modeling techniques, which should be iteratively applied and refined in a management decision context to be most effective. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
