

The British Journal of Children s Diseases, 1910, Vol. 7 (Classic Reprint) (Paperback)

Filesize: 5.39 MB

Reviews

The book is straightforward in go through better to understand. it had been writtern quite flawlessly and valuable. You can expect to like the way the author publish this book.

(Reyes Murphy)

THE BRITISH JOURNAL OF CHILDREN S DISEASES, 1910, VOL. 7 (CLASSIC REPRINT) (PAPERBACK)**DOWNLOAD**

Forgotten Books, United States, 2015. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from The British Journal of Children s Diseases, 1910, Vol. 7 Continued and persistent loss in weight, in spite of our utmost endeavours to rectify the fault, is the only condition under which the substitution of artificial feeding for maternal nursing is justifiable, except, of course, in those exceptional cases in which the health of the mother makes it compulsory. Even with the greatest care artificial feeding can rarely be accomplished from the time of birth without more or less severe disturbance, and to be successful the method we adopt must so far imitate breast feeding that the various constituents of the food can not only be digested by the infant, but also without throwing too great a strain upon its assimilative capacity. Biological chemistry has not as yet sufficiently advanced to make it a safe guide by itself, but the bio-chemist has taught us once and for all that cows milk, however scientifically and carefully prepared, can never be so modified as to be equal in chemical and nourishing properties to that of the mother. An important essential to successful feeding is a thorough knowledge and understanding of the differences, both qualitative and quantitative, which exist between the constituents of human and cow s milk. I shall therefore in the first place endeavour to describe these differences (as far as they are at present understood), and afterwards I shall describe the methods of feeding which I have adopted during the last few years, more especially in those cases where, owing to constitutional debility or previous improper methods, the digestive capacity of the infant has been so damaged as to make feeding by ordinary dilution an impossibility. A uniform method...
