### **Reviews**

*A high quality pdf as well as the typeface applied was exciting to see. It really is written in simple words and phrases rather than difficult to understand. You will not really feel monotony at any time of your time (that's what catalogs are for relating to in the event you question me).*

PRINCETON ARCHITECTURAL PRESS, United States, 2010. Paperback. Condition: New. Language: English . Brand New Book. Since its launch in 1993 by the nonprofit U.S. Green Building Council, the Leadership in Energy and Environmental Design (LEED) program has become the standard measure of sustainability for buildings worldwide. Successfully reaching one of four LEED certification levels Certified, Silver, Gold, or Platinum requires specific point totals, which differ among building types. Getting certified, in addition to altruistic benefits, allows building owners to take advantage of a growing number of state and local government incentives. The menu of potential points available for various practices ranges from installing bike racks on-site to documenting the source of the iron ore used in any construction steel. As any architect or developer can attest, navigating this complex system of required prerequisites and credits can be maddening. It may be good to be green, but it's still far from easy. An architect's knowledge of materials can make or break a building's rating. Though LEED's performance-based criteria exclude individual materials and products from earning points toward certification, their specific use can. Apply a material in the wrong situation and you may not get credit for it. Fortunately, with a little insider knowledge, you can also use one material to get credit in two, three, or even more areas. LEED Materials is packed with critical information on nearly two hundred materials, products, and services. Organized in the Construction Specifications Institute (CSI) MasterFormat industry standard in building contracts this highly visual guide makes sure your material choices and uses will maximize your LEED credits. LEED Materials includes a foreword by Steven Winter, former chairman of the U.S. Green Building Council.
