The above table taken by consent from Cl0dd s Primer of Evolution (Longsman, Green CO.) gives a fairly correct impression of the strata and the first appearance of typical plants and animals. An impression of the time necessary to make all the layers of rocks may be inferred from the fact that the Tertiary Age required five million years. CHAPTER V. THE FACTORS OF EVOLUTION. There are various forms of life to be seen on earth but all the forms are composed of cells made up of the same chemical elements. On this account all life is the same in essence, and whether it be of flower or bird it has basic qualities that are the same, as, for instance, irritability, nutrition, reproduction, growth. We should say then that life that is always the same animates the forms of all the many hundred thousands of species of both plants and animals. There are three thousand species of mammals and ten thousand species of birds now living. Of insects there are three-hundred thousand speoies now living, some of which, as ants and bees and spiders, have powers of mind that make them among the wonders of the world. The rock-s.of the earth s crust hold as fossils, which we can now-8X3il1ll1e, the remains of many thousands of forms of life...
