Rutgers University Press, United States, 2009. Hardback. Condition: New. Language: English . Brand New Book. The place: The steep mountains outside Salt Lake City. The time: The first decade of the twentieth century. The man: Daniel Jackling, a young metallurgical engineer. The goal: A bold new technology that could provide billions of pounds of cheap copper for a rapidly electrifying America. The result: Bingham s enormous Glory Hole , the first large-scale open-pit copper mine, an enormous chasm in the earth and one of the largest human-made artifacts on the planet.
