Reviews

This pdf will not be simple to start on reading through but extremely enjoyable to see. I have read and i also am sure that i will planning to read through again once more in the foreseeable future. You wont really feel monotony at whenever you want of the time (that's what catalogues are for relating to if you request me).

Forgotten Books, 2017. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Freight Shipment of California Strawberries in Mechanically Refrigerated Rail Cars: Test Shipments, 1967 All berries were precooled before loading into the cars. Most lots were held overnight in the precooling room. The average temperature of the fruit at loading was 39 F. Air temperatures in the car and berry temperatures in the center of the pallets were measured with Ryan recording thermometers. Thermostats on the rail cars were set at 36 F. (2 tests), or 34 (3 tests). All cars had a modified atmosphere for lettuce of 2-percent oxygen 2-percent carbon monoxide (co), and 96-percent nitrogen (n2) introduced before shipment. Some individual pallets were enclosed in a sealed 5-mil polyethylene bag to increase coz concentration around the berries. The 002 increase was provided by either purging with a gas mixture that produced an initial lo-percent 002 and 5-percent 02 level, or by placing a l-pound block of dry ice inside the enclosed pallet. The dry ice was wrapped in paper and placed in an empty berry flat. Another empty flat was placed below the ice to prevent freezing of ad jacent fruit.
