

Improving energy efficiency in the agro-food chain (Paperback)

By -

Organization for Economic Co-operation and Development (OECD), France, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.For a variety of reasons, energy use in the agro-food sector continues to rise, and in many countries, is highly dependent on fossil fuels, contributing significantly to greenhouse gas emissions. It is therefore becoming urgent to consider how the food supply chain can improve its energy efficiency. This report analyses ways of improving energy use in the agro-food sector in relation to both producers and consumers, and puts forward a set of policy recommendations that governments can introduce to meet green growth objectives and achieve sustainable development.

Reviews

This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- Ally Reichel

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You wont feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).
