

Pamphlets on Biology Volume 2931 Kofoid collection

Filesize: 8.36 MB

Reviews

Here is the finest ebook i have got read until now. It really is simplistic but excitement within the 50 percent in the book. Once you begin to read the book, it is extremely difficult to leave it before concluding.

(Lupe Connelly)

Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1904 Excerpt: . . . by means of chains of events, can be legitimately applied to vital action, and furthermore whether such explanations are useful. At the outset, however, they meet with a grave difficulty, for at the present time no one knows exactly what it is that needs to be explained. Some tell us, life is motion; others call it a chemical-physical process; whereas some declare it synonymous with consciousness. Herbert Spencer, after cudgeling his brains for many years, arrived at a statement which seemed to him, as it has to many since then, the best possible. Life, he says, is the continuous adjustment between internal relations and external relations. Unfortunately none of these definitions is really satisfactory. Who, on being told that life is the continuous adjustment between internal and external relations, can feel that now he has the secret firmly in his grasp. Indeed at present a hard and fast definition is scarcely possible, and, if it were, would add more to the comfort of the dialectician than to the progress of knowledge. When we understand life the definition will come of itself, and then no one will care to use it. Most of the biological work of to-day is an attempt to find out exactly how living things make their living, and the biologist, regardless of his party affiliations, is happy to say that all who study these questions agree that living things make use of machinery. Is not the respiratory system a machine by which oxygen...
