Healing Arts Press. Paperback. Condition: New. 288 pages. An investigation into the root cause of the modern acne epidemic--fluoride--and how to remove it from your diet and lifestyle for clear, healthy skin Chronicles the existing acne research to reveal fluoride was behind the rise of teenage acne in the mid-20th century and the dramatic increase in adult acne today Details how to avoid fluoridated foods and beverages as well as other common sources of fluoride, such as pesticides, pharmaceuticals, and household products Explains how to displace fluoride stored in your bones and other tissues through nutrition and the careful use of iodine According to a recent study, over 20 percent of men and 35 percent of women experience acne after the age of 30. At the same time, remote indigenous societies--such as the Inuit before they moved to town in the 1960s--experience no acne at all, even among their teenagers. Many things have been cited as causing acne, from sugar, chocolate, or pizza to dirty pillowcases, hormones, or genetics, but none of these causes have been able to explain the majority of acne cases, nor why chronic acne is on the rise. Using her FBI intelligence analyst skills, Melissa Gallico identifies fluoride as the root cause of the modern acne epidemic. Chronicling the existing acne research, she reveals where each study went wrong and what they missed. She shares her personal 20-year struggle with severe cystic acne not only on her face, but on her neck, chest, back, and even inside her ears. She explains how her travels around the world and her intelligence work helped her pinpoint exactly what was causing her treatment-resistant flare-ups--fluoridated water, foods, dental products, and the systemic build-up of childhood fluoride treatments. She details how to avoid fluoridated foods and beverages and explains how sources...
