Brand New Book ***** Print on Demand *****.Theoretical physics has become a modern version of the Emperor s New Clothes where ridiculous and absurd theories are proposed and accepted because doubting them would indicate some mental impairment or lack of knowledge. Physicists have abandoned reason and reality and turned physics into a make believe science where illusions are created to support their delusions. In a science that is supposed to be based on observation and experimentation the acceptance of a conclusion that experiments know if they are being watched and change the results when observed invalidates all experiments and observations. This degeneration of physics from a science to fantasy is a result of Einstein s theories. His general and special relativity theories are based on the assertion that the speed of light is constant in a vacuum and cannot be exceeded which he proposed in his theory of the photon and for which he won a Nobel prize. The photon was preposed as a solution to the problem of the photoelectric effect and define the nature of light. Light was known to be an electromagnetic wave but when certain light waves strikes certain metals or crystals it produces an immediate electric current. A wave is an energy disturbance within a medium and it was believed that for a wave to dislodge an electron from an atom it must transfer a quanta of energy to the electron and this would not happen immediately. The photon proposed that light had bundles of waves, or photons, that acted as a particle so light had both a particle and wave nature. The speed of a wave is determined by the forces in the medium in which it travels...
