GRIN Verlag. Paperback. Book Condition: New. Paperback. 32 pages. Dimensions: 8.3in. x 5.8in. x 0.1in. Essay from the year 2012 in the subject Biology - Zoology, grade: A, Atlantic International University (School of Science and Engineering), course: Sericulture - Master of Science (Applied Entomology), language: English, comment: Dear Alfred: as you can see in your transcript, your assignment has been evaluated. Good essay. In judging an investigation and its outcome not only seeks to determine if it says something true about the world, but if what it says is not trivial, and also how important it is. Oliv (2008, p. 36). Best regards, Dr xxx. Advisor. Atlantic International University. , abstract: Sericigenous fauna are animals that are capable of producing a natural and highly valued fibre called silk. According to Prasadet al. (2010), the word Sericigenous is derived from a Greek word Seri meaning Silk. Sericigenous fauna have a wide biodiversity, which can be primarily categorized as insect and non-insect groups. The non-insect group includes the Adriatic mussel (seashell *Pinna nobilis* and related species which produce silk referred to as sea silk) and a Madagascanian spider. The silk of non insect origin is of no importance to textile market as its use is limited in the area of optical instruments. The insect group includes all the silk spinning insects whether foraging on mulberry plant or other non mulberry plants; their silk is the one used in making garments. Therefore, Sericigenous resources include the silk producing animals and the associated plants they feed on. This paper reviews the sericigenous resources biodiversity that have so far been identified and documented and the efforts that have been put in place to conserve and utilize them sustainably. The emphasis here is laid on the Sericigenous insects, the silk moths, and their food plants. This item...
