Mind, Brain, Body, and Behavior: The Foundations of Neuroscience and Behavioral Research at the National Institutes of Health (Hardback)

By -

IOS Press, United States, 2005. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. This volume, in my view, should prove to be a landmark publication. Farreras and her colleagues have thrown available light onto what will prove to be a rich field of historical research and historically informed science policy. - Wade E. Pickren, Journal of the History of the Behavioral Sciences This volume breaks new ground in assessing the intramural research conducted at the United States National Institute of Mental Health and the National Institute of Neurological Diseases and Blindness (today the National Institute of Neurological Disorders and Stroke) in the 1950s. The research conducted in these institutes was pioneering and laid the foundation for current neuroscience and behavioural research. Dr. Ingrid Farreras uses the records of the time and also oral histories conducted with retired institute scientists to present the institutional context in which the research was conducted. Topics in her discussion include the history of the United States Public Health Service, the creation of the two institutes at the National Institutes of Health, the organization of their extramural and intramural research programs, and brief summaries of the research that the fifteen...
