

Groundwater quality

By Ncube, Mercy

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Geochemistry, genesis and health implications of fluorotic groundwater in South Western Zimbabwe | Chronic consumption of excess fluoride above the WHO limit of 1.5mg/L might lead to dental, and in extreme cases skeletal and crippling fluorosis. This book aims to illustrate the study results found when screening fluoride presence and investigating its probable sources in suspected high fluorotic areas in southwestern Zimbabwe. It was found out that 40% of 220 groundwater samples contained fluoride above WHO limit. Thirty-five percent (35%) out of 467 pupils examined had dental fluorosis with an average prevalence rate of 65%. Geology played a major role in influencing the groundwater quality. These analysis is mainly targeted for the groundwater resources and treatment, climate change and public health and low cost technology developers. | Format: Paperback | Language/Sprache: english | 228 pp.

Reviews

A top quality publication along with the font used was intriguing to read. I really could comprehend everything using this written e book. Its been designed in an remarkably straightforward way and it is only after i finished reading through this publication by which basically altered me, modify the way i believe.

-- Cathrine Larkin Sr.

Very useful to all of group of people. I actually have read through and so i am certain that i will planning to study yet again once again down the road. I am just very easily can get a satisfaction of looking at a created book.

-- Mark Bernier
