

Synthesis, Characterization and Decomposition Studies of Tris(n, N-Dibenzylidithiocarbamato) Indium(iii): Chemical Spray Deposition of Polycrystalline

Filesize: 4.47 MB

Reviews

Great e book and beneficial one. It is amongst the most awesome pdf i actually have read through. You wont feel monotony at at any time of your own time (that's what catalogs are for relating to if you request me).

(Dorothy Daugherty)

SYNTHESIS, CHARACTERIZATION AND DECOMPOSITION STUDIES OF TRIS(N, N-DIBENZYLIDITHIOCARBAMATO) INDIUM(III): CHEMICAL SPRAY DEPOSITION OF POLYCRYSTALLINE

Bibliogov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 24 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. Tris(bis(phenylmethyl)carbamodithioato-S, S), commonly referred to as tris(N, N-dibenzylidithiocarbamato) indium(III), $\text{In}(\text{S}_2\text{CNBz}_2)_3$, was synthesized and characterized by single crystal X-ray crystallography. The compound crystallizes in the triclinic space group $P1\bar{1}$ with two molecules per unit cell. The material was further characterized using a novel analytical system employing the combined powers of thermogravimetric analysis, gas chromatography-mass spectrometry and Fourier-Transform infrared spectroscopy to investigate its potential use as a precursor for the chemical vapor deposition (CVD) of thin film materials for photovoltaic applications. Upon heating, the material thermally decomposes to release CS_2 and benzyl moieties into the gas phase, resulting in bulk In_2S_3 . Preliminary spray CVD experiments indicate that $\text{In}(\text{S}_2\text{CNBz}_2)_3$ decomposed on a Cu substrate reacts to produce stoichiometric CuInS_2 films. This item ships from La Vergne, TN. Paperback.
