Betascript Publishers Dez 2009, 2009. Taschenbuch. Book Condition: Neu. 220x150x5 mm. Neuware - Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. In mathematics, the projective unitary group $PU(n)$ is the quotient of the unitary group $U(n)$ by the right multiplication of its center, $U(1)$, embedded as scalars. Abstractly, it is the isometry group of complex projective space, just as the projective orthogonal group is the isometry group of real projective space. In terms of matrices, elements of $U(n)$ are complex n times n unitary matrices, and elements of the center are diagonal matrices equal to $e^{i\theta}$ multiplied by the identity matrix. Thus elements of $PU(n)$ correspond to equivalence classes of unitary matrices under multiplication by a constant phase . 76 pp. Englisch.
