

## Characterizing the complex multiscale geometry of plants : Characterizing multiscale nature of plants using fractal geometry descriptors, application on light-interception modeling

By David Da SILVA

Editions Universitaires Europeennes EUE Feb 2011, 2011. Taschenbuch. Condition: Neu. This item is printed on demand - Print on Demand Neuware - With concerns such as sustainable development or climat changes, controlling and understanding plant growth has become important society matters. Computer models that uses plant architecture, called 'functional-structural plant models' (FSPMs), have become more and more widespread. Contrariwise to agronomic models based on the relations between few parameters, FSPMs allow to assess the relation between the three-dimensional structure of plants and the physical and ecophysiological processes that drive their development. However, plant architecture, and particularly its geometry, is rather complex and can be described at different detail levels. In this thesis we wanted to characterize the complex multiscale geometry of plants with few descriptors in order to be able to acknowledge the structure in simple models of light interception. 168 pp. Englisch.

### Reviews

*It is an remarkable pdf that I actually have actually read. It really is packed with knowledge and wisdom I am very happy to tell you that this is the finest ebook i actually have go through during my very own life and may be he very best book for actually.*

*-- Hailey Jast Jr.*

*It in a of my personal favorite ebook. It is probably the most awesome publication i have read through. You wont really feel monotony at anytime of the time (that's what catalogs are for regarding in the event you check with me).*

*-- Juliet Kertzmann*
