Springer-Verlag New York Inc., United States, 2012. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Manufacturers are increasingly, under pressure from their major stakeholders to integrate environmental issues in the design and management of their products. These stakeholders include customer, regulators, employees, communities, and interest groups who have a common stake in protecting the earth from pollution and in limiting the exploitation of earth s limited natural resources. Manufacturers recognize that being environmentally responsible also offers competitive advantage to the firm. Hence the Handbook of Environmentally Conscious Manufacturing is written as a state-of-the-art reference to environmentally conscious manufacturing (ECM). The chapter authors were carefully selected. All the chapter authors have done extensive research and / or practice work in the field of ECM. The Handbook covers all the major topics in Environmentally Conscious Manufacturing. There are specific chapters to deal with sustainable manufacturing, recycling, eco-labelling, life cycle assessment, and ISO 14000 series of standards, as well as decision-making aspects of Environmentally Conscious Manufacturing. Decision-oriented topics on supply chain, decision models, quality initiative, environmental costing and decision support systems are also covered. The influence of ECM on marketing imperative is also covered. The Handbook is the...
