Reviews

This ebook will never be effortless to get started on studying but extremely fun to read through. It is actually written in easy phrases and never difficult to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.

ROUTLEDGE HANDBOOK OF BODY STUDIES (HARDBACK)

Taylor Francis Ltd, United Kingdom, 2012. Hardback. Condition: New. Language: English . Brand New Book. In the last three decades, the human body has gained increasing prominence in contemporary political debates, and it has become a central topic of modern social sciences and humanities. Modern technologies - such as organ transplants, stem-cell research, nanotechnology, cosmetic surgery and cryonics - have changed how we think about the body. In this collection of thirty original essays by leading figures in the field, these issues are explored across a number of theoretical and disciplinary perspectives, including pragmatism, feminism, queer theory, post-modernism, post-humanism, cultural sociology, philosophy and anthropology. A wide range of case studies, which include cosmetics, diet, organ transplants, racial bodies, masculinity and sexuality, eating disorders, religion and the sacred body, and disability, are used to appraise these different perspectives. In addition, this Handbook explores various epistemological approaches to the basic question: what is a body? It also offers a strongly themed range of chapters on empirical topics that are organized around religion, medicine, gender, technology and consumption. It also contributes to the debate over the globalization of the body: how have military technology, modern medicine, sport and consumption led to this contemporary obsession with matters corporeal? The Handbook's clear, direct style will appeal to a wide undergraduate audience in the social sciences, particularly for those studying medical sociology, gender studies, sports studies, disability studies, social gerontology, or the sociology of religion. It will serve to consolidate the new field of body studies.
