Reviews

*This book may be worth purchasing. I am quite late in start reading this one, but better then never. Once you begin to read the book, it is extremely difficult to leave it before concluding.

MAGNETIC RESONANCE IN COLLOID AND INTERFACE SCIENCE: PROCEEDINGS OF A NATO ADVANCED STUDY INSTITUTE AND THE SECOND INTERNATIONAL SYMPOSIUM HELD AT MENTON, FRANCE, JUNE 25 - JULY 7, 1979 (PAPERBACK)

DOWNLOAD PDF

Springer, Netherlands, 2012. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.In 1976, on the occasion of the Centennial of the American Chemical Society, H. A. RESNÉ and C. G. WADE organized an international symposium on magnetic resonance in colloid and interface science which brought together a large number of scientists from the United States and from abroad. The aim of this symposium was to include all experimental inorganic, organic and biochemical systems in which molecules are bound to interfaces and to show the contribution of various techniques based on magnetic resonance to the knowledge of these systems. This ambitious program resulted into a very interesting gathering that initiated a more interdisciplinary approach to the problem of interfaces. Because of the success of this symposium it was suggested that a similar meeting should be organized in Europe within the next three years. Professor J. FRAISSARD accepted this task but, considering the rapid developments in the theory and in the applications of the magnetic resonance spectroscopies, the organizing committee decided to arrange the meeting to be held in MENTON (France) in two parts, the first being a School and the second the Symposium proper. The former was intended to review and to teach theoretical aspects as well as to discuss the experimental results derived from these advanced methods; the Symposium was to be for the discussion of the latest results at the highest level. Softcover reprint of the original 1st ed. 1980.
