

Meter-Wave Synthetic Aperture Radar for Concealed Object Detection (Hardback)

By Hans Hellsten

Artech House Publishers, United States, 2017. Hardback. Condition: New. Language: English . Brand New Book. This book presents the principles of meter wavelength synthetic aperture radar, bandwidth and SAR imaging. It focuses on foliage penetration and scattering of VHF/UHF radar signals, including the basic laws of electromagnetism, homogeneous media, media/non-flat media discontinuities and ground reflectivity. The characterization of additive noise, antenna systems, waveforms and emission adaption is critical information to the advancement in sensor and signal processing for below ground imaging. It also compares collected SAR data and highlights low frequency SAR system design aspects. Professionals in the radar space, especially engineers in the defence and security space and government officials looking to assess potential of low frequency radar, will find the material helpful and up-to-date.

Reviews

Extremely helpful for all class of people. We have read through and that i am confident that i am going to going to read through again again down the road. Its been designed in an exceedingly basic way in fact it is simply following i finished reading this pdf in which in fact altered me, alter the way i think.

-- Noel Stanton

Absolutely one of the best pdf We have ever read. I really could comprehended every little thing using this written e book. I am easily could get a satisfaction of reading a written publication.

-- Dr. Odie Hamill
