Partridge Singapore, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.This book which I am about to publish is titled -Food and Mental Health Guide-. I feel that the time is now right for food to become the mainstream component of mental health care. We study the brain of mentally ill people and discover that mental illness is also related to our diet. What we eat ultimately affects different parts of our brain and different diet can actually help to cure mental illness. Researchers today conclude that eating well is some how related to lower anxiety levels, less depression, less mood swings, fewer cravings and eating problems such as binge eating and bulimia, reductions in pre-menstrual tension and less fatigue. In this article I also show the readers what each type of food for example food rich in iron can help prevent anaemia, which can cause not only fatigue, apathy but also depressed mood. The reason I wrote this book is because numerous evidence has linked diet with mental health and this is growing at a rapid pace. I hope my readers will enjoy reading this book as well as learn something from this manuscript.
