Forgotten Books, 2017. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The Anatomy of Labour as Studied in Frozen Sections and Its Bearing on Clinical Work Though the study of the Anatomy of Labour by frozen sections is a breaking of new ground, yet enough has been done to prove that this virgin soil will yield an abundant harvest and to justify a survey of what has already been gathered in. I have limited myself as much as possible to the study of frozen sections, as these give us the closest approximation to the condition during life; but it has been necessary to supplement this with what has been learned from the study of fresh specimens as well as spirit-hardened sections, especially as regards the condition of the cervix before labour and Of the interior of the uterus after it. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
