APPLIED PARALLEL COMPUTING. ADVANCED SCIENTIFIC COMPUTING: 6TH INTERNATIONAL CONFERENCE, PARA 2002, ESPOO, FINLAND, JUNE 15-18, 2002. PROCEEDINGS

Springer. Paperback. Book Condition: New. Paperback. 626 pages. Dimensions: 9.2in. x 6.0in. x 1.0 in. These proceedings contain the papers presented at PARA 2002, ternational Conference on Applied Parallel Computing.PARA2002washeldin Espoo, Finland, June1518. 2002, andhostedbyCSC, theFinnishinformation technologycenterforscience. Thegeneralthemeoftheconferencewasadvanced scienticcomputing. The conference demonstrated the ability of advanced scientic computing to solvere al-world problems, andhighlightedmethods. instruments. andtrendsin futurescientic computing. The conference began with a one-day tutorial session onGridprogramming. The conference focused on an application-oriented, multi-disciplinary, and multi-scale approach. Awidevarietyofscienticcomputingapplicationswere introduced, from semiconductor processing and behavior of the human body to $oceanic and atmospheric phenomena. \ \ Scientic computing coupled with multi-disciplinary and multi-disciplinary$ tise will play a signicant role in solving challenging problems in science.scaleexpconferenceaimstodemonstratehowdicultproblemscanbesolvedusingthematical modeling, ecientnumericalmethods, advancedprogramdevelment, andtoolsinparallelcomputing. The conference also focused on data analysis. The amount of information available is rapidly increasing. Dataminingcanbeusedtosearchforregularities inhugedatasets, andnewtechniquesinvisualization, e. g., virtualenvironments, canbeusedintheinterpretationofnumericalinformation. Totheaudience, $the conference also reported on recent and future trends in \\ generic technologies in scientic computing.$ Thesecoveredvariousenvironments, e. g., clusters, supercomputers, and Gridtechnologies. April2002 JuhaFagerholm, JuhaHaataja, JariJarvinen, MikkoLyly, and Ville Savolainen VII..
