Pineapple Nematodes of Southern Nigeria and Their Management

By Fisayo Daramola

LAP Lambert Academic Publishing. Paperback. Condition: New. 132 pages. Dimensions: 8.7in. x 5.9in. x 0.3in. Nematode pests of pineapple have not been well studied in Nigeria compared to other countries worldwide. In this study, the geographical distribution of nematodes associated with pineapple in Southern Nigeria and their management with organic manure and chemical pesticide was investigated. Pineapple fruits from the chemical-treated plots were also analyzed for pesticide residue in the fruits using Gas Chromatography-Mass Spectrometry (GC-MS). The study indicated a widespread distribution of plant-parasitic nematodes of pineapple in Southern Nigeria. Carbofuran (pesticide) and poultry manure effectively suppressed the population of plant-parasitic nematodes in naturally-infested pineapple plots and promoted crop yield. Carbofuran and its metabolites were not detected in the pineapple fruits that were tested for pesticide residue, suggesting that Carbofuran is not likely to constitute dietary risks for consumers of fruits from treated plots. This study is of importance to resource-poor farmers for nematode control, to the fruit processing and manufacturing industries as well as regulatory agencies for food safety and environmental protection. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.

Reviews

Complete guideline! Its this type of great read through. it absolutely was writtern quite perfectly and helpful. I am very happy to explain how this is basically the best book i actually have read through during my personal life and can be he very best book for at any time.

-- Joshua Gerhold PhD

A very awesome book with perfect and lucid reasons. It really is basic but shocks within the 50 percent of the book. Its been designed in an exceptionally easy way and is particularly merely right after i finished reading this ebook where in fact changed me, change the way i think.
