Palgrave Macmillan. Hardcover. Book Condition: New. Hardcover. 248 pages. Dimensions: 9.3in. x 6.2in. x 0.9in. The final quarter of the 20th century saw the beginnings of a transformation with the decline of industrial economy and rise of the information economy. Today the economy is increasingly centered around intangible assets and services, intellectual assets, new business models, open innovation, and network economies. The central issue however is still the same, delivering firm value in both the short and long term while maintaining a sustainable competitive advantage. These issues are examined within the context of innovation, the evolution of industry sectors, and advanced financial analysis, corporate finance, quantitative finance, and risk management concepts. Financial analysis includes stocks and flows, reformulating the financial statements and ROCE and ROIC ratios, while corporate finance covers DCF and real options investment analysis methods. Advanced derivatives methods are applied to financial and real assets in case studies that cover energy, biotech, climate change, media, commercial real estate, and modularity to illustrate the issues. Updated and revised, this third edition applies advanced financial analytics within a strategic framework that recognizes an environment where sustainable competitive advantage is a progressively more difficult task. Real options offer the link to value and the strategic opportunities that lie in an increasingly dynamic landscape. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Hardcover.
