DESIGN OF SURVIVABLE NETWORKS

Springer. Paperback. Condition: New. 204 pages. Dimensions: 9.2in. x 6.1in. x 0.5in. The problem of designing a cost-efficient network that survives the failure of one or more nodes or edges of the network is critical to modern telecommunications engineering. The method developed in this book is designed to solve such problems to optimality. In particular, a cutting plane approach is described, based on polyhedral combinatorics, that is able to solve real-world problems of this type in short computation time. These results are...
