

STARPVD - A new improved PVD Image Steganography

By Thanekar, Sachin Arun

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Nowadays hiding of secret messages into a digital image is the most widely and commonly used technique. It uses the weakness of the Human Visual System (HVS). There exists a large selection of approaches to hiding information in images. The research to develop strong steganographic and steganalysis techniques is a continuous process. Pixel Value Differencing (PVD) steganography method embeds secret data in images based on the differences in neighbouring pixels. In Pixel Value Differencing and Tri Pixel Value Differencing (TPVD) steganography methods the data is hidden in 2 x 2 Square blocks. PVD and TPVD methods are vulnerable to histogram based attacks. In STARPVD approach 3 x 3 pixel blocks are used. Due to this eight pixel pairs are formed. Hence more data is hidden with this approach with better visual quality and better security. | Format: Paperback | Language/Sprache: english | 56 pp.

Reviews

The publication is easy to read through and safer to comprehend. It is actually loaded with wisdom and knowledge. It has been printed in an extremely simple way and is particularly simple right after I finished reading through this pdf where it actually modified me, affecting the way I believe.

-- Ms. Clementina Cole V

This is the very best publication I have got read until now. It is definitely simplified but shocks within the fifty percent of the pdf. You may like how the article writer created this pdf.
