Neuware - Risk management has become a necessary activity in the administration of a hospital .The present study focused on assessment of some aspects of risk management in Main University Hospital in Alexandria (MUHA), including fire prevention and control measures , performance of hospital staff in providing some patient care activities and procedures which have the potential of risk of infection , knowledge of hospital staff regarding prevention of some occupational illnesses , training programs relevant to employees safety , and the role of relevant committees in implementation of risk management activities . The study was conducted in one general medical ward and one surgical ward in MUHA .Six checklists were designed to collect data about fire prevention and control measures and five patient care practices . Two questionnaires were prepared for interview with nurses , housekeepers and chairmen of safety related hospital committees namely : occupational health and safety committee , infection control committee and environment committee . The study revealed shortcoming of risk management in the MUHA .In spite of the presence of committee . 224 pp. Englisch.
