It is about 200 years since his Principia appeared, and chemistry and electricity have since then as sciences been born into the world. Newton was concerned with the study of material bodies and their attractive force - gravitation. Chemistry is concerned with the minute atoms into which those material bodies are supposed to be capable of being divided, and their attractive force - affinity. I shall try to explain what the distinction is between these forces, but in the meantime let me say that, though we might have expected Nature's law of attraction would be universal in its principle, Newton's law of so-called universal attraction is not universal in principle, inasmuch as it requires to be replaced or supplemented by other...
