

Panhard Levassor: Pioneers in Automobile Excellence

By David Beare

Amberley Publishing. Paperback. Condition: New. 128 pages. Dimensions: 9.2in. x 6.5in. x 0.4in. Panhard and Levassor was a ground-breaking company whose innovations set the standard for modern motoring. Not only was it the first company to produce a vehicle with an internal combustion engine mounted at the head of the chassis rather than under the drivers seat, the entire Panhard layout of engine, gearbox, shaft drive to rigid rear axle, set the standard which is still used today. As the author reveals, Panhard and Levassor can also claim to be the first manufacturer to sell cars commercially. The author follows the fortunes of the company and its two founders, the affable and portly Rene Panhard complementing the intelligent and somewhat haughty Emile Levassor. From the late 1800s through the two world wars, they continued to produce revolutionary designs, including sleeve valves, monocoque chassis units and the new economy cars with air-cooled flat-twin engines and bodies and chassis made largely of aluminium. The story ends with the take over of the company by Citroen, which ultimately absorbed the Panhard and Levassor creative genius into their own designs. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.
