Reviews

A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.

Oxbow Books, United Kingdom, 2014. Hardback. Book Condition: New. 279 x 221 mm. Language: English Brand New Book. The site of Tepe Yahya in southeastern Iran is famous, among other important aspects, for the Proto-Elamite complex dated to around 3000 BC (Period IVC). The material culture of Period IVC is not exclusively limited to its Proto-Elamite component, but is also characterized by the presence of elements from other Middle-Asian cultural ceramic traditions. In addition to a synthesis of the Proto-Elamite period and the material assemblage at Tepe Yahya, *The Proto-Elamite Settlement and Its Neighbors* provides an updated review and comprehensive discussion of the Proto-Elamite sphere, its relations to Mesopotamia, and its eastern Middle Asian neighbors. This innovative book illustrates that the multi-cultural situation at Tepe Yahya Period IVC was present across many sites in Middle Asia and that, in addition to the Proto-Elamite sphere and the cities of Mesopotamia, Middle Asia around 3000 BC was incorporated within an interactive multi-players network of polities. Benjamin Mutin, Author, is a Research Fellow for the American School of Prehistoric Research, Harvard University. He is an archaeologist who specializes in Middle Asian proto-history and who has worked in Pakistan, Afghanistan, Iran, Tajikistan, and Oman. He holds a Ph.D. in Prehistory, Anthropology, and Ethnology from University of Paris 1 Pantheon-Sorbonne. C. C. Lamberg-Karlovsky, General Editor, and Project Director for Tepe Yahya, is the Stephen Phillips Professor of Archaeology, Department of Anthropology, Harvard University, Peabody Museum (Director 1977-1990).
