# Managerial Monitoring of a Single Data Stream (Classic Reprint)

Filesize: 6.05 MB

Reviews

It is great and fantastic. I actually have read and so i am certain that i am going to going to go through once again yet again in the future. I realized this ebook from my dad and i encouraged this book to find out.

(Dr. Kayden Gerlach)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Managerial Monitoring of a Single Data Stream Much of management activity involves monitoring: scanning and surveying situations for which there is a potential need for corrective action. The purpose of monitoring is to routinely assess this potential and thereby to indicate when managerial intervention is required. If there is never a need for corrective action, then there is never an economic benefit to monitoring, for payoffs are obtained only through actions which improve the economic circumstances of the firm. Monitoring involves the gathering and assessment of information. It is what Simon calls the intelligence phase of decision making [1977] and what Pounds calls the process of problem finding. [1969] Monitoring is differentiated from other managerial information processing activities by its purpose, to routinely assess the potential need for corrective action. Routine implies a repetitive and somewhat structured activity. Corrective action suggests that the situation is being guided toward some target or goal. This paper is an inquiry into the design of information systems to support managerial monitoring functions. The guiding paradigm in this effort is provided by information economics theory. As Treacy [1981] has observed, economics models of information value concentrate upon only the choice phase of decision making. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
