By Mark Cioc

University of Washington Press. Paperback. Condition: New. 272 pages. Dimensions: 8.9in. x 5.9in. x 0.8in. The Rhine River is Europe's most important commercial waterway, channeling the flow of trade among Switzerland, France, Germany, and the Netherlands. In this innovative study, Mark Cioc focuses on the river from the moment when the Congress of Vienna established a multinational commission charged with making the river more efficient for purposes of trade and commerce in 1815. It thus invites comparison with similarly over-burdened rivers such as the Mississippi, Hudson, Colorado, and Columbia. The Rhine's environmental problems are, however, even greater than those of other rivers because it is so densely populated (50 million people live along its borders), so highly industrialized (10 of global chemical production), and so short (775 miles in length)....
