Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1905 Excerpt: .It is the duty of the geometer to abstract from the physical sciences those domains which may be expressed in terms of pure space, to study the geometric founda Es ist eine tief eingewurzelte Gewohnheit vieler Geometer, Siitze zu formnlieren, die im allgemeinen gelten sollen, d. h. einen klaren Sinn iiberhaupt nicht baben, zudem noch hiiufig als allyeintin giiltig hingestellt oder mangelhaf t begründet werden, Dies Verfahren wird, trotz etwanigen Yerweisungen auf Triiger sehr beriihmter Namen, spsiteren Geschlechtern sicher alfi ganz unzulässig erscheinen, scheint aber in nnsrem kritischen Zeitelter von vielen als eiue berechtigte Eigmtiimhchknt der Geometrie betrachtet zu werden. Jahr. Dent. Math-ler., vol. 11 (1902), p. 100. fAs an example may be mentioned the theorem of Mains and Dupin, known for almost a century, that the rays emanating from a point are converted, by any refraction, into a normal congruence. Quite recently, LeviCivita succeeded in showing that this property is characteristic; that is, any normal congruence may be refracted into a bundle. tions (or, as some would put it, the skeletons) of the various branches of mechanics and physics. Most of the actual advance, it is true, has hitherto come from the physicists themselves, but undoubtedly the time has arrived for more systematic discussions by the mathematicians. In addition to the importance which is due to possible applications of such work, it is to be noticed that we meet, in this way, configurations as interesting and remarkable as those created by the geometer s imagination....
