CreateSpace Independent Publishing Platform. Paperback. Book Condition: New. This item is printed on demand. Paperback. 88 pages. Dimensions: 9.0in. x 6.0in. x 0.2in. Civil Information Management Systems (CIMS) are emerging as a resource which allows commanders to build a Common Operational Picture (COP) upon which to base their operational planning and execution. Geospatial Information Systems (GIS) are a type of CIMS. GIS have been underutilized by the military which traditionally uses geographic data as cartographic and imagery support for military intelligence and maneuver purposes. This monograph provides a framework for determining the value of using GIS as a tool in counterinsurgency (COIN). Given the crucial role that geography plays in the Colombian internal conflict, this case presents a unique opportunity to evaluate the capabilities that GIS offer. Recent experience shows that, despite achieving a significant measure of success on the battlefield, the Armed Forces of the United States of America face continuing challenges in adapting to the requirements of a long term global struggle. The nature of the current conflict or Long War requires effective engagement, coordination, and collaboration with interagency and international partners. Counterinsurgency efforts in Colombia are an example of this environment, and this study concludes that the applicability...
