The Godfather of cyberpunk a mad scientist bravely meddling in the outrageous and heretical Rucker created Bopper Robots, who rebelled against human society in his award-winning classic Software. Now, in 2953, moldies are the latest robotic advancement evolved artificial lifeforms made of soft plastic and gene-tweaked molds and algae, so anatomically inventive and universally despised that their very presence on the planet has thrown the entire low-rent future into a serious tailspin. So the moon is the place to be, if you re a persecuted moldie or an enlightened flesher intent on creating a new, more utopian hybrid civilization. Of course up there, there are other intergalactic intelligences to contend with and some not so intelligent who have their own agendas and appetites.
