

Space Psychology and Psychiatry (Hardback)

By Nick Kanas, Dietrich Manzey

Springer-Verlag New York Inc., United States, 2008. Hardback. Book Condition: New. 2nd ed. 2008. 238 x 156 mm. Language: English . Brand New Book. The 1st edition of this title was the winner of the 2004 IAA Life Sciences Book Award. This 2nd edition represents a complete revision with about 23 more pages and new material compared to the first edition; it includes several recent studies involving astronauts and cosmonauts; and discusses the new field of space tourism. It deals with psychological, psychiatric, and psychosocial issues that affect people who live and work in space. Unlike other books that focus on anecdotal reports and ground-based simulation studies, this book emphasizes the findings from psychological research conducted during actual space missions. Both authors have been active in such research. What is presented in this readable text has previously been found only in scientific journal articles. Topics that are discussed include: behavioral adaptation to space; human performance and cognitive effects; crewmember interactions; psychiatric responses; psychological countermeasures related to habitability factors, work-design, selection, training, and in-flight monitoring and support; and, the impact of expeditionary missions to Mars and beyond. People finding this book of interest will include psychology and social science students and...

Reviews

This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- Ally Reichel

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You wont feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).

-- Prof. Kirk Cruickshank DDS
