It gives you a whole other perspective on why you wake up every day. - Taylor Hanson Conception of a baby is life s greatest miracle. Ensuring your offspring stays healthy is a task in itself, and for a new parent can be stressful. As the world increases in population, the food supply starts shrinking. This is where science steps in and helps out with genetically modified food (GMOs), antibiotics in food, and pesticides. All of the aforementioned chemicals are harmful to adult humans, but even more harmful to babies. Finding new, chemical-free food sources for your baby is important. Making your own baby food is really easy to do, and the best part is YOU control what goes in it.
