Excerpt from Symposium on International Standards Information and Isonet: Proceedings of a Symposium Held at the National Bureau of Standards, Gaithersburg, Maryland, October 11-12, 1979 Recent events in the United States, including the enactment of the Trade Agreements Act of 1979, have brought increased national attention to the need for improved mechanisms for exchange of information on standards, technical regulations, and certification systems on a worldwide basis. Title IV, Technical Barriers to Trade (standards), of the Trade Agreements Act directs the National Bureau of Standards to maintain a national standards information center to serve as the central national collection facility for information relating to standards activities, whether such standards, systems, or activities are public, private, domestic, or foreign, or inter national, regional, national, or local.
