Brand New Book ***** Print on Demand *****.Excerpt from Clinical Lectures on Orthopaedic Surgery: Delivered at the Philadelphia Hospital; Nos. I., II. The Etiology, Morbid Anatomy, Varieties and Treatment of Club-Foot Gentlemen: Every observant person, whether within or without the profession of medicine, must be impressed with the prevalence of various deformities in individuals of the human family, and their very existence must cause him to reflect upon the nature of their being, their chronic and progressive character, and the apparent difficulty of arresting them. Much of this has been due to lack of knowledge of the mechanical factors which enter into their etiology, and the very general neglect the subject of malformations has received, from an educational standpoint, in our medical schools. Though twenty-five years have elapsed since the establishment of orthopaedic surgery as a legitimate special branch of surgical art, its science and practice, noticeably in this city, are permitted to occupy a very subordinate position, and its principles practically are untaught. In this clinic, which will initiate the course of lectures upon orthopaedic surgery in the Philadelphia Hospital, which it will be my privilege to deliver before you this Spring, no better subject could be chosen than one descriptive of club-foot, a condition which you will frequently meet in practice, and of which many examples may be constantly observed in the nervous, obstetrical and surgical wards of this hospital.
