# HYPOTHALAMIC AND ADIPOSE TISSUE DYSFUNCTION: A RISKY ASSOCIATION FOR OBESITY

Condition: New. Publisher/Verlag: Karger | Special Topic Issue: Neuroendocrinology 2017, Vol. 104, No. 4 | In spite of significant attention being devoted to the topic, overweight and obesity prevalence continues to increase worldwide. A systematic analysis performed in 2013 referred to the global burden of these conditions and showed that more than 50% of the world's 671 million obese people live in 10 countries. This special issue addresses a number of basic and clinical aspects of obesity, including the innate...
